

CAMS CORPORATION RECOGNIZED WITH 2013 BEST PRACTICES AWARDS

5/10/2013

Houston, TX – May 10, 2013 – Consolidated Asset Management Services (CAMS), a Tessa- ArcLight joint venture, proudly announces that it received eight Best Practice Awards at the 38th Annual Combustion Turbine Operations Technical Forum (CTOTF) Spring Conference, held April 8, in Myrtle Beach, SC. The primary objective of the Best Practices Awards program is to recognize valuable contributions made by plant, engineering and asset management personnel to ensure reliable, efficient and safe performance of gas turbine- based generating facilities. “These awards are evidence of the high standard of operations CAMS and our employees are committed to providing. Our team members continue to incorporate new ideas to improve performance, reduce costs, ensure safety and increase efficiencies. It’s an honor to be recognized, and we couldn’t be more proud of our staff and their accomplishments”, said Joseph Sutton, CAMS Chief Executive Officer.

Of the eight Best Practices Awards CAMS received, two were Best-of-the-Best Awards. Of the seven 2013 awards categories, CAMS was recognized in the following: Operations and Maintenance; Performance Improvements; Plant Safety Procedures; and Workforce Development. Winners were selected, after extensive review, by a panel of ten judges from the CTOTF Leadership Committee. Details of the awards can be found online at the Combined Cycle Journal (CCJ) website, as well as in the CCJ Onsite CTOTF conference issue.

CAMS received awards at the following facilities:

Effingham County Power

Performance Improvements Award for the development and implementation of its successful ‘on-site’ training program (Best-of-the-Best Award)

Workforce Development Award for its modifications to the LP bypass controls to optimize the flow of condensate to the LP steam drum (Best-of-the-Best Award)

Plant Safety Procedures Award for its arc flash safety program (Best Practices Award)

Sabine Cogen LP

Plant Safety Procedures Award for its ‘in-house’ design and development of safety database (Best Practices Award)

Crockett Cogeneration LLC

Workforce Development Award for its ‘hands-on’ engineering internship program (Best Practices Award)

Lea Power Partners

Operation and Maintenance Award for its ammonia system modification plan created to ensure the more efficient and safe delivery of ammonia (Best Practices Award)

Operation and Maintenance Award for its hydrogen system modification plan (Best Practices Award)

Operation and Maintenance Award for its new waste water reclamation program (Best Practices Award)

Established in 2007, Consolidated Asset Management Services (CAMS) is a privately held company, headquartered in Houston, Texas. CAMS provides quality, competitively priced management, commercial and operations services to the Power Generation, Exploration & Production and Midstream sectors of the Energy industry. CAMS emphasis is on providing clients with significant bottom line results and demonstrated value creation, all while operating and maintaining facilities safely, efficiently and in an environmentally friendly manner. CAMS comprehensive range of services includes: Asset Management, Operations and Maintenance, Construction Management, Commissioning and Start-Up, Engineering, Repair and Field Support, Commercial Origination and Optimization, and Project Development.
